

## *Numerology Analysis*

I have studied & practised Numerology for over 40 years.  
I have developed my own unique system of objective analysis and interpretation.  
Your Numerology Analysis takes place as a face to face consultation.  
I prefer to deal solely with your birth date.

Topics of discussion may include:

- The theme of your life path and your life purpose.
- Your strengths and challenges and the gifts you have been given to assist you on achieving your life path.
- Your dominant Planes of Activity & your dominant Modes of Expression.
- Your Life Path in the context of the Tree of Life.
- Your Personality Profile derived from the numerology of your date of birth (based upon the Myers Briggs Personality Types)
- The stages of your life and your Life Cycle Analysis. Where you are now, where you have been, and where you may be in the future based upon projections of your patterns.
- Personal Day, Month & Year numbers and how that relates to the Universal Cycles.

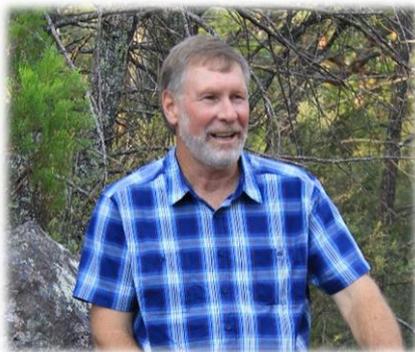

The Numerology Analysis can include a couple's analysis.  
This looks at the compatibility of the couple.  
Comparing the charts of both birth dates.

A Numerology Analysis can lead to a Tarot reading  
Numerology tells you where you **should** be in life.  
Tarot tells you where you **are!**  
The challenge is then to draw the two closer together.  
This results in a centering & a balancing of your life energies.

I expect a Numerology session can easily use up an hour of your time and maybe more.

We need to ensure that we all have the time available to enjoy a relaxed interaction with no time restraints applying pressure.

I would generally see this happening around a morning/afternoon tea.  
Depending on your time frames and mine it can happen any time.
